CSS DU LITTORAL

COMMITMENT-TO-
SUCCESS PLAN
2023-2027

Background

Founded in 1967, the Centre de services scolaire du Littoral (CSSL) enjoys a unique geographical location. It stands out as being bilingual and governed by an administrator appointed by the Members of Cabinet.

Its territory covers Kegaska to Blanc-Sablon, as well as Port-Menier on Anticosti Island. Most of it is made up of small, insular communities far from major centres, where boats and planes are required to transport students, staff and goods. Despite the region's wealth of resources, the economic sectors are not very diversified, and the average income and level of education of households are below the Quebec average. As in other isolated regions, the communities are facing declining populations; however, the challenges of isolation have positively shaped mindsets, developing people's resilience and creativity.

The CSSL has just under 400 students in 10 schools, most of which provide preschool, elementary and secondary education. In addition, the majority of these and three centres provide general adult education services, such as Literacy, Francization, Presecondary and Secondary Cycles 1 and 2. Lastly, the CSSL offers a number of vocational training programs, in French and English, in partnership with other service centres or school boards.

Small numbers in schools and classrooms mean the school teams know their students, their families and the surrounding community well. Teaching mainly takes place in multi-level classrooms, which can be a challenge for both students and staff. Many teachers often teach multiple levels of education.

The CSSL has a higher graduation rate than Quebec as a whole. However, graduating students with special needs remains a challenge. A recent survey revealed that few students at the school service centre enjoy reading and writing, which is another major challenge for the organization.

The transportation, general secretariat, educational, human, material, information technology and financial departments as well as general administration manage professional and technical resources for the entire organization. Given the specifics of the region, the teams must be creative to successfully deliver services. Isolation, distance and bilingualism make it difficult to hire, allocate and retain staff. To this end, the CSSL focuses on developing everyone's skills, sense of belonging and professional effectiveness.

United around a shared vision, the educational community of the Centre de services scolaire du Littoral is committed to evidence-based practices in order to offer everyone the opportunity to reach their full potential.
